Highlight of the week: Year 5

In year 5 this week we have been learning about forces in science. This is the equipment from an experiment we completed looking at gravity. We found out that Galileo said that even if two balls have a different mass, if they are the same size, they will fall at the same speed. We figured out that the hockey ball and the tennis ball fell at the same speed! Up next in science we will be looking at levers, pulleys and gears.
